

Green and Clean Campus

Our institution is dedicated to maintaining an eco-friendly and clean campus environment, promoting sustainability and cleanliness in all areas. The commitment to these goals is reflected in various initiatives and practices aimed at creating a healthy and green atmosphere.

i. Green Initiatives of the Institution:

1. **Tree Plantation Drives:** The institution organizes regular tree plantation drives, engaging students and staff in planting native trees and shrubs across the campus. These drives contribute to increasing green cover, enhancing biodiversity, and promoting awareness about environmental conservation.
2. **Solar Energy Utilization:** To reduce the institution's carbon footprint, solar panels have been installed on the rooftops of several buildings. These panels provide renewable energy for lighting and other electricity needs, significantly reducing reliance on conventional energy sources.
3. **Waste Segregation and Recycling:** The campus has implemented a waste management system that promotes segregation of waste at the source. Separate bins for biodegradable and non-biodegradable waste are placed throughout the campus, ensuring proper disposal and encouraging recycling practices.

4. ii. Cleanliness in Washrooms, Buildings, and Campus:

Maintaining cleanliness across the campus is a top priority, ensuring a healthy environment for students, faculty, and staff. The institution follows strict cleanliness protocols:

1. **Washroom Cleanliness:** Regular cleaning schedules are in place for all washrooms on campus. A dedicated cleaning staff ensures that washrooms are sanitized, keeping them hygienic and well-maintained. Hand sanitizers, soaps, and cleaning supplies are replenished regularly to promote personal hygiene.
2. **Building and Classroom Cleanliness:** Classrooms, hallways, and other building spaces are cleaned daily to ensure a dust-free and tidy environment. Desks, floors, and shared spaces are kept in order, with proper waste disposal systems in place to prevent littering.
3. **Campus Cleanliness:** The campus grounds are regularly cleaned and monitored to maintain a litter-free environment. Weekly campus cleanliness drives, involving both students and staff, help in keeping the lawns, gardens, and pathways neat and attractive. Dustbins are strategically placed across the campus to encourage proper waste disposal, and all staff members and students are encouraged to contribute to keeping the campus clean and green.
